Holstens

Jan 2011 - Jan 2015

Co-Manager / UX Designer & Developer

Designed & developed HTML email campaigns, complete website design.

Projects

Weather App

Designed and developed a RESTful React Weather application.

Ability to search thousands of destinations as well as setting your current location. A photo is also loaded to represent the destination using Unsplash. Detailed weather is available for that day with simplified data for coming week.

Responsibilities

Personal project to build a RESTful Weather App.

Technologies

React, Sass, Material UI, Apixu Weather API, Unsplash Photos API.

Basket & Checkout, iD Mobile

Working with UX designers, back end developers and product owners in a fully agile environment to migrate and further develop an existing eCommerce basket & checkout project to the iD Mobile codebase.

This project ensured the basket & checkout journey was secure, testable and scalable for over 1 million active customers.

Responsibilities

Complete responsibility for the front end development.

Technologies

HTML, Sass, Bootstrap, JavaScript, jQuery, Symfony, Docker, Gulp.
